

Even as we battle COVID-19, we must not ease up the fight against TB: hard won gains are now under threat.

We need to Find. Treat. All to save lives and end preventable TB deaths.
TEST FOR BOTH COVID AND TB!

2015

2021 2022

2030

THE CLOCK IS TICKING

We are running out of time to fulfil global commitments to end TB.

We need:

1. political will and accountability
 2. financial resources
 3. engagement from all sectors
 4. community ownership
- And we need them now.

2015

2021 2022

2030

THE CLOCK IS TICKING

We urgently need more effective medicines, vaccines, and tools.

If we are to end TB by 2030, innovation is key.

2015

2021 2022

2030

THE CLOCK IS TICKING

Only 2 in 3 people with TB are known to be getting quality care and COVID-19 is making this worse.

We need to scale up systematic screening and access to care.
FIND.TREAT.ALL.
#ENDTB

2015

2021 2022

2030

THE CLOCK IS TICKING

2 in 3 people with drug-resistant TB aren't getting the treatment they need.

We need to expand access to WHO-recommended fully-oral treatment regimens that improve treatment outcomes and save lives.

2015

2021 2022

2030

THE CLOCK IS TICKING

Global progress in provision of TB preventive treatment lags behind with only 1 in 5 of the 30 million people targeted for access by 2022 reached with TB preventive treatment.

We need to expand access to TB preventive treatment that can stop the infection from developing into disease.

2015

2021 2022

2030

THE CLOCK IS TICKING

Undernutrition, poverty and other risk factors are the root cause of millions of people falling ill with TB.

We need multisectoral action and accountability to reach and treat all with care and prevent disease.

THE CLOCK IS TICKING

Fear of stigma is a major obstacle, preventing people from obtaining the TB care they need.

We need to stand against stigma and discrimination, and stand for human rights, equity and ethics.

2015

2021 2022

2030

THE CLOCK IS TICKING

TB is the leading killer of people with HIV.

Fast-track access to ART and TB treatment, and scale up of TB preventive treatment in people with HIV to saves lives.
